Space and Naval Warfare Systems Command Contract Modification

SAN DIEGO – Raytheon Company, Marlborough, Mass., is being awarded a \$19,861,994 modification for in scope enhanced polar satellite pre-planned product improvements to a previously awarded cost plus-award fee development, cost plus-fixed fee, firm-fixed price and time and material contract (N00039-04-C-0012) for the Navy Multiband Terminal (NMT). The NMT is the next generation of military satellite communications terminal to be deployed onboard submarines, ships and shore installations that provide maritime communications using the Military Strategic and Tactical Relay, Advanced Extremely High Frequency, Defense Satellite Communications System and Wideband Global Satellite Communications families of satellites. This contract includes options which, if exercised, would bring the cumulative value of this contract to an estimated \$979,752,906. This contract combines purchases for the U.S. Navy (94 percent) and the governments of Canada (3.5 percent), United Kingdom (1.7 percent) and Netherlands (0.8 percent) under the Foreign Military Sales (FMS) Program. Work will be performed in Largo, Fla. (83 percent) and Marlborough, Mass. (17 percent), and is expected to be completed by March 2014. If all options are exercised, work could continue until December 2015. Contract funds will not expire at the end of the current fiscal year. This contract was competitively procured with two offer(s) received via the Commerce Business Daily's Federal Business Opportunities website, and the SPAWAR e-Commerce Central website. The Space and Naval Warfare Systems Command, San Diego, Calif. is the contracting activity.
